DIRECTORS' REPORT TO THE SHAREHOLDERS

1. Your Board of Directors are pleased to present your Company's Annual Audited Accounts for the year ended 30th June, 2008, alongwith the Auditors' Report.

CRISIS OF PAKISTAN TEXTILE INDUSTRIES:

2. Pakistan's Textile Industry had played a vital role in the economy of the Country upto the year 2004. Textile accounted for more than 64% of the total exports, 48% of Industrial Employment, 11% share of the GDP and 55% of bank advances.
 3. Unfortunately, for the last four years this industry, especially the Spinning Sector has been in deep crisis due to the disproportionate increases in the costs of production. Gas prices have been increased by 92% during last two years from Rs. 172 to Rs. 330 per mmbtu. Recently the electricity cost has gone up by 70% with constant load shedding; and due to the recent abnormal increase in fuel prices, transport cost has jumped by 100%. When compared to 2004, the banks have raised their mark-up rate from 6% to 16.50%, an increase of 175%.
 4. As a result of the above mentioned increases the manufacturing costs have registered an increase of 300% since 2004. This single cost increase has been instrumental in the malaise that the Spinning Industry finds itself today. Finance cost as a ratio of Sales was 1.23 % in the Year 2004 but in the year 2008 - it is 9.36%.
 5. The gas prices for captive power generation have increased by 92% i.e., from Rs. 172 in 2004 to Rs. 330 per mmbtu in 2008; which has totally disturbed the feasibility of gas based power generation projects. Interestingly the cost of the gas for captive power generation in Bangladesh is approximately Rs 80 per mmbtu i.e. 1/4th of our cost.
 6. As far as polyester staple fibre (PSF) and viscose is concerned, all over the world the usage of this man made fiber is around 50% whereas, in Pakistan, this ratio is close to 23%. The primary reason being the protection given to the local polyester fibre manufacturers and their cartelized pricing mechanism. All this adds up to a price differential of close to 50% with our competitors India and China and such Pakistani products become uncompetitive.
 7. Wage increases of labour force totaling 140% since last June, 2006 (from Rs 2,500 to present Rs 6,000) without any qualitative and quantitative control on production of the textile industry in Pakistan.
- FINANCIAL PERFORMANCE OF THE COMPANY FOR THE YEAR 2008:**
8. We are pleased to inform you that despite deep crisis in the Country's

ANNUAL REPORT 2008

OPERATING PERFORMANCE:

- Your Company had an installed capacity in operation 71,696 spindles during the year ended June 30, 2008. With this capacity, the Company has produced 4,954,304 Kgs. as against 5,491,651 Kgs in the twelve months period ended June 30, 2007. When actual production is converted into 20's count, the total production works out to be 24,517,579 Kgs during the year under review against 26,498,796 Kgs in the year 2007. The operating efficiency achieved was 94.60% for the year under review as against 99.50 % of the year 2007. Average count spun was 58.08 in 2008 and in 2007 was 55.08. The operating efficiency decreased by 3,699,441 spindles not worked due to unprecedented gas and power outages from December, 2007 to February, 2008.
- PAYMENTS OF BANK'S LOANS (OBTAINED IN 2004 & 2005) INSTALMENTS & MARKUP, BANK'S OVERDUES AND REQUEST DATED 21st MAY, 2007 FOR RE-SCHEDULING & RESTRUCTURING OF OUTSTANDING BANK LOANS AND MARKUP PAYABLE BY THE COMPANY AS ON JUNE 30, 2008.**

As explained above, the deep financial crisis since 1st January, 2005 to 30th June, 2008, we have earned profit before taxation and

ANNUAL REPORT 2008

incremental depreciation Rs. 42,620 million alongwith payment of suppliers bills of new unit and taxes under section 80 D, Rs. 15.863 million, addition of fixed assets Rs. 167.050 million from our own cash resources, **total cash flow during this period (three years) amounts to Rs. 484.684 million includes Rs. 22.818 million provided by sponsor's associated company to raise the paid-up capital.** We have paid Rs. 393.250 million (Rs. 39.33 crore) principal Rs. 110.780 million plus markup Rs. 282.470 million (Rs. 28.25 Crore) from 1st July, 2006 to 30th June, 2008.

We applied to National Bank of Pakistan during the year 2007 for restructuring alongwith request of lowering markup at least the spread of the banks. We are pleased to inform you that National Bank of Pakistan has approved on July 23, 2007 our request of restructuring and rescheduling of the loans.

- Due to crisis in Pakistan's Textile Industry especially in the Spinning Sector and the Government of Pakistan by not providing any remedial measures, the future prospects for the industry are not very promising.
- The Cotton Crop for coming season 2008-2009 is expected to be short by 3.00 million bales than Government target of 14.20 million bales due to heavy rains in the cotton growing areas in Punjab and Sindh in July, August & September, 2008 against industry's demand of over 16.000 million bales. The prices of domestic cotton are likely to be higher by about 30% to 35% than the level at which yarn & fabrics prices are being offered in the export markets for the last three years. In addition to this, labour cost of the unskilled force has been increased by 109% w.e.f 1st July, 2006 again increased 31% from 1st July 2008 and main burden of this raise shall be on textile industry as it is labour intensive.
- NOT WITHSTANDING THE FOREGOING CONSTRAINTS, YOUR DIRECTORS WOULD LIKE TO ASSURE YOU THAT EVERY EFFORT SHALL BE MADE TO CONTROL THE COST OF PRODUCTION AND BY FURTHER IMPROVING THE QUALITY OF FINISHED GOODS (YARN OF SUPER FINE COUNTS TO MEET AIR JET LOOMS DEMAND), HIGHER SALE RATES, IN ORDER TO ACHIEVE PROFITABILITY OF THE COMPANY ENABLING US TO REPAY THE BANKS LOANS AND TO PROMOTE & SECURE THE INTEREST OF THE SHAREHOLDERS DESPITE SERIOUS UNFAVOURABLE CRISIS PREVAILING IN THE TEXTILE SECTOR OF THE COUNTRY.**

ANNUAL REPORT 2008

The effective interest / mark-up rates for the monetary financial assets and liabilities are mentioned in respective notes to the financial statements.

40.1 Foreign exchange risk

Foreign currency risk arises where receivables and payables exist due to transactions with foreign undertakings. Payables exposed to foreign currency risks are monitored by the management and, if necessary, are covered through forward foreign exchange contracts. However, no foreign forward exchange contracts were outstanding at the year-end.

40.2 Concentration of credit risk

Credit risk represents the risk of loss that would be recognised at the reporting date if counter parties failed to perform as contracted. The Company's credit risk is primarily attributable to its trade debts. To reduce the exposure to credit risk the Company has developed a formal approval process whereby credit limits are applied to its customers. The management continuously monitors the credit exposure towards the customers and makes provision, if required, against those balances considered doubtful of recovery.

40.3 Fair values of financial assets and liabilities

The carrying values of all financial assets and liabilities reflected in the financial statements approximate their fair values. Fair value is determined on the basis of objective evidence at each reporting date.

40.4 Liquidity risk

Liquidity risk reflects an enterprise's inability in raising funds to meet commitments. The Company follows an effective cash management and planning policy to ensure availability of funds and to take appropriate measures for the new requirements.

40.5 Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in the market interest rates. The Company usually borrows funds at fixed and market based rates and as such the risk is minimised.

40.6 Capital risk management

The objective of the Company when managing capital is to safeguard its ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders and to maintain a strong capital base to support the sustained development of its business.

The Company manages its capital structure by monitoring return on net assets and makes adjustments to it in the light of changes in economic conditions. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividend paid to the shareholders or issue new shares.
